

***When You Know The Facts
There's Only One Sensible Choice***

THE HIGHEST QUALITY WIRE YOU CAN BUY

A wiring harness is only as good as its wire. That's why Painless harnesses use only the highest quality wire available: thermal cross-linked (TXL) polyethylene wire rated to 125°C (275F) degrees. TXL wire has twice the voltage rating of standard general purpose (GPT) wire. It delivers performance on demand in high performance applications. Plus, it will not kink and is abrasion resistant, making it much easier to route.

COLOR-CODED, PREPRINTED WIRE

Wiring a car can sometimes be an intimidating project, but not with a Painless chassis harness. Open the box and the wire is already bundled in sections: front, rear, engine, etc. Simply mount the fuse block, start with one section of the car and route the wire. Each wire is printed with the application so you know right where it goes. To further ensure a painless installation, each chassis harness is color-coded for easy trouble-shooting.

MODERN BLADE-TYPE OEM-STYLE FUSE BLOCKS

The nerve center of every Painless chassis harness is our fuse block. These fuse blocks feature easy-to-find, modern blade-type fuses, clearly labeled circuits, corrosion resistant construction and a compact design.

WIRING PRE-TERMINATED TO FUSE BLOCK

This is the most important feature of a Painless chassis harness. How well the wiring is connected to the fuse block, how secure and permanent the connection, determines how well the entire system will perform. Every Painless chassis harness comes out of the box with the wiring already terminated using state-of-the-art Packard presses and all harnesses are then carefully assembled by hand. This assures you of a trouble-free performance that screw connections cannot match. Plus, half the job is already done for you. Just mount the block and route the wires.

SUPERIOR CIRCUIT PROTECTION

Every Painless chassis harness is protected with a 70 amp Maxi-Fuse. Unlike a fusible link, which melts in the event of an electrical short, a Maxi-Fuse is a large bladed fuse designed for circuit protection in high amperage, high performance applications. It is easily installed and easily replaced.

EVERYTHING YOU NEED

You know you'll be completing your installation with quality components because the fuses, flashers, relay, wire ties and mounting brackets you need to do the job right are in the Painless chassis harness kit.

COMPREHENSIVE INSTRUCTIONS & TECH SUPPORT

Even seasoned wiring pros have a question now and then and, if the answer is not in the comprehensive, step-by-step instruction manual that comes in each kit, it's nice to know that you're just a toll free call away from the most professional technical assistance help line in the industry.

GUARANTEED FOR LIFE

Only Painless is confident enough in the quality of its harnesses to back them with a Lifetime Guarantee; a promise of quality unmatched anywhere. This is the culmination of seventeen years of market leadership, quality design and manufacturing innovations. It means you can share our confidence that when you install a Painless chassis or fuel injection harness, you're wiring your car with the very best there is... Guaranteed!
